

**25 Words**

Fortinet solutions securely support a remote workforce which is an essential component of any organization's business continuity and disaster recovery plan.

50 Words

The hardware acceleration in every FortiGate NGFW offers a scalable remote working connectivity. Teleworkers can use either an SSL VPN or an IPsec VPN FortiClient Fabric Agent for large scale, secure tunnels back to the corporation. Power users and executive users would benefit from deploying a FortiAP or a FortiGate NGFW for additional capabilities.

100 Words

Fortinet solutions are designed to be easy to use from initial purchase through end of life. FortiGate NGFWs include zero-touch deployment functionality. This enables appliances to be quickly deployed at remote sites, to ensure business continuity and support for telework, to be pre-configured before shipping and automatically set up once they arrive on-site.
